

SUMMARY

Focused, results-oriented and Passionate Software Engineer having around **1-year experience and practicing development from more than 3 years.**

- Having good experience in **Java Language and Amazon Web Services.**
- Having sound understanding of object-oriented concepts and principles.
- Can implement design pattern and principles.
- Sound understanding of Agile methodology
- Effective communication skills in interacting with international people too.
- Highly motivated with the ability to work effectively in teams as well as independently.
- Hard working and dedicated

EDUCATION

B.Sc. (Computer Science and Information Technology) from College of applied Business, in 2018. Secured an aggregate of 70.88%.

TECHNICAL SKILLS:

Database Tools	MySQL, Postgres, Oracle, MS SQL Server
Programming	Java (Core, Maven, Spring Framework, Spring Boot, Socket Programming, Threading, Design Pattern, Design Principle, Lambda functions, Jstl, Thymeleaf)
Web Technologies	HTML, CSS, jQuery, Ajax, JavaScript
BI Tools	JIRA
Testing tools	J unit, Selenium, REST Api
Version Controlling tool	GitHub, BitBucket
Cloud Skills	Amazon Web Services (Serverless Application)
Data Analysis Skill	R(Basic), Python(Basic)

Professional Experience

- 🔗 **Junior Software Engineer-IGC Technology(Spring Boot)**
- 🔗 **Junior Software Engineer – NFSInnovation pvt.ltd, Product Development(Core Java)**
- 🔗 **Junior Software Engineer- Convergetree technologies pvt ltd (Intern Java Spring)**
- 🔗 **Aws Developer- Genese Software Solution (Aws Intern)**

Details:

I worked as a software developer. In above organization I worked on core java, spring frameworks, spring boot as a role of full stack java developer on the IGC Technology, NFSInnovation pvt ltd and Convergetree technologies pvt ltd. I worked as an Aws developer (Intern) in Genese Software Solution where I build Serverless Application. Some of the distinct project I work are:

Project 1:

- **Title** : Automatic School Management System(2017)
- **Language** : Java
- **Database** : MySQL
- **Implemented Skills** : Design Patterns, Hibernate, core Java

Responsibilities:

- Full Stack Developer

Project 2:

- **Title** : Automatic Task Management System(2018)
- **Language** : Java
- **Databases** : MySQL
- **Implemented Skills** : Design Patterns, Spring Framework, Hibernate

Responsibilities:

- Full Stack Developer

Project 3:

- **Title** : Automatic Event Recommendation System(2018)
- **Language** : java
- **Database** : MySQL
- **Implemented Skills** : Design Patterns, Core Java, Hibernate

Responsibilities:

- Full Stack Developer

Project 4:

- **Title** : Hospital Reporting System(2019)
- **Language** : Java
- **Database** : Postgresql
- **Implemented Skills** : Design Patterns, Spring Boot

Responsibilities:

- Backend Developer

Project 5:

- **Title** : Nursing Student Database(2019)
- **Language** : Java
- **Database** : My Sql
- **Implemented Skills** : Design Patterns, Spring Boot

Responsibilities:

- Backend Developer

Project 6:

- **Title** : Serverless Application(2019)
- **Platform** : AWS
- **Database** : DynamoDB
- **Implemented Skills** : Ajax,DynamoDB, Lambda function,Api Gateway,Aws S3

Responsibilities:

- Full Stack Developer
